Overview

I'm a web developer proficient in MERN stack, specifically ReactJs. I am good at handling React states using Redux and context API. I can work with hooks in a proper manner and do e2e testing using Cypress. I can also style web pages using CSS, SCSS and Tailwind. Currently looking for an opportunity to grow and demonstrate my skills.

Education

Maulana Mazharul Haque Arabic Persian University

August 2021 - June 2024

Bachelors's in Computer Application

Bihar, India

Experience

Akriti Samajik Sansthan

Feb 2021 – June 2021

Software Development Engineer Intern

Bihar, India

- Created a backend + frontend internal tool to manage student and staff information. Adding this feature saved the manual hovering time of the LF's over paper to manage these data. It reduced the paper work of institute by **70%**. and reduced the cost by 12%
- It handles data of 20+ enquiries per day, 35 staffs and **200+ students** in an trimester
- Designed the UI of the webapp using Figma and coded the site in HTML, CSS, JavaScript, PHP with setting up MySQL database as per the demand of the employer.

Projects

CryptoTracker | *ReactJs, CSS, Crypto API* | [GitHub link](#) | [Live link](#)

4
